Fig. 11

Top view of a circular device. The device has a central circular opening (400) and a smaller circular opening (405) at the top. The outer edge is defined by a series of points (410, 420, 418, 475, 495, 418, 420, 410). The device is shown with a dashed line indicating a vertical axis of symmetry.

Fig. 13

FIG. 4 is a perspective view of a second embodiment of the device. It shows a similar structure to FIG. 1, with a main body (400) and a protruding section (405). A central opening (410) is present. A cross-section (420) is shown, revealing internal components (425) and a base (488).
